## **Arctic**

### **Sectional Sno-Pusher**

The Sectional Sno-Pusher from Arctic has a patented moldboard design and slip hitch. The AR-400 steel cutting edges can scrape compacted snow and ice down to the pavement, eliminating followup plowing. The universal mounting system enables the mounting hookup to be changed in minutes.

## **BOSS Snowplow**

### **HTX V-Plow**

The HTX V-Plow from Boss is for lighter-duty and half-ton trucks. The plow is built with a Full Moldboard Trip Design to help prevent plow damage when an obstacle is encountered. The enclosed hydraulics protect against corrosion and hydraulic freeze-up, according to the company

## **CASE**

### **Sectional Snow Pushers**

The Sectional Snow Pushers from CASE Construction Equipment are available in six different sizes for heavy- and light-duty applications. The moldboard sections move independently and have a Hardox 450 steel cutting edge. The pushers are compatible with CASE equipment as well as other brands.

## **Bobcat Company**

### **Snow Blade**

The Snow Blade from Bobcat has an angle that is adjustable from the operator's seat. It can oscillate five degrees. The moldboard can angle right or left up to 30 degrees. Optional features include rubber or polyurethane cutting edges and end-wing kits.

## **Buyers/SnowDogg**

### **VXF Generation II**

The VXF Generation II has simplified harnesses and connectors for quicker installation. The floating A-frame helps with even cutting edge wear and

optimal scraping. It has an energized rod seal cylinder design with anodized aluminum gland nuts for efficiency and long life.

## **Caterpillar**

### **Straight Snow Push**

The Straight Snow Push without Trip is a new attachment for Caterpillar. The snow push is available in 8-, 10- and 12-foot widths with a reversible bolt-on rubber cutting edge. It features a moldboard specially profiled to roll and fold snow, while the skid shoes allow the height of the cutting edge to be adjusted.

## **Fisher Engineering**

### **HDX Snowplow**

The HDX snowplow offers an adjustable attack angle that can be set to 55, 65 or 75 degrees to accommodate different plowing surfaces, weather conditions or operator preferences. The plow features an articulating A-frame that allows the blade to pivot from side to side to freely follow the contours of the plowing surface for a cleaner scrape and more even cutting edge wear.

## **Hiniker**

### **C-Plow**

The reversible C-Plow from Hiniker is operated as a conventional plow in the forward plowing mode, with the normal hydraulic angling and spring-trip moldboard functions. For backdragging, the upper 3/4 of the moldboard is hydraulically folded over. The plow is available in 8- and 9-foot widths and features a high clearance split trip-edge and Hiniker's Quick-Hitch system.

## **Meyer Products**

### **Power Box Plow**

Meyer's Power Box Plow telescopes from 8 feet to 12 feet using in-cab controls. It has adjustable left and right hydraulic wings that move to the operator's desired length. It attaches to skid-steers, tractors and compact wheel loaders with a free-floating mount. It comes standard with a rubber cutting edge and free floats 20 degrees for uneven pavement.

## **Pro-Tech**

### **Sno-Pusher**

The rubber edge Sno Pusher from Pro-Tech comes in varying widths from 10 feet to 30 feet. It can be used on multiple surface types, including those that are sensitive to steel edges. The Sno Pusher features SBR extruded rubber along with fully welded construction.

## **SnowEx**

### **HDV V-Plow**

The SnowEx HDV heavy-duty V-plows are built with a responsive direct lift system. Available in either durable powder-coated mild steel or stainless steel and blade widths of 8 foot, 6 inches or 9 foot, 6 inches. The Automatixx power-assisted attachment system provides quick plow hook-up.

## **Western**

### **DEFENDER**

The Western DEFENDER is a compact plow designed specifically for mid-size

pickup trucks and SUVs. With a reinforced, high-strength steel blade, it's durable and powerful. A mechanical attaching system provides quick and easy hook-up. It features a high-strength, low-weight, alloy-steel blade and six vertical ribs reinforce the blade.
