RESEARCH TRIANGLE PARK, N.C. – Environmental Science, a division of Bayer CropScience LP, gathered more than 200 employee volunteers on Bayer's 150th anniversary, Aug. 1, to foster a healthier space for people in need at Zuma's Rescue Ranch. Zuma's Rescue Ranch is an animal-assisted learning center in Denver that pairs rescued horses with at-risk children to help them learn to bond, build trust and develop life skills to support their future. Bayer donated employee time, expertise and manpower, as well as Bayer Advanced products, to provide this facility with much needed beautification, new construction and maintenance updates.

Jodi and Paul Messenich founded Zuma's Rescue Ranch in 2004 with the mission to provide a place of sanctuary and healing for the voiceless humans and animals in the metro Denver region.

Bayer employees broke into task force teams to complete site improvements including the construction and restoration of landscape beds, garden gates and walkways. The team built and installed a pergola, a duck pond and a chicken coop as well as landscaped the facility's outdoor venue, cleaned stalls, seeded pastures, and painted Zuma's signs and indoor arena. Bayer Advanced donated products from its Natria line of non-synthetic solutions to protect the facility against pests, weeds and diseases, and to support both onsite activities and ongoing maintenance.
