

Disease and Weed Control Products

Source: www.TurfMagazine.com

Summer is hard on plants. Varying temperatures, as well as excessive rainfall or drought situations can leave your clients' landscapes in disarray. Add diseases, fungi and weeds to the mix, and you may need some help to keep them looking their best. In this month's product focus, you'll find the right tools you need to help the properties you manage battle these summer stressors.

For information on any of these products, fill out the enclosed reader service card and drop it in the mail. We even pay the postage!

Featured Disease and Weed Control Products

ArborSystems

A single fall application of Shepherd fungicide protects against oak wilt, Dutch elm disease, anthracnose and more. Use with the Direct-Inject QC injection system.

www.arborsystems.com

Jonathan Green

Lawn Fungus Control is a systemic fungicide that controls summer patch, fusarium blight, dollar spot, copper spot, red thread, pink and gray snow molds and more.
