

Drafix Software's PRO Landscape Version 19 Available

Source: www.TurfMagazine.com

KANSAS CITY, Mo. – Drafix Software's new [PRO Landscape Version 19](#) software adds 1,000  new images making the total now more than 11,000 of the highest quality images available in any landscape design software.

Version 19 also includes 3D enhancements allowing the user to automatically generate a 3D house shell giving a more realistic rendering. Other features include improved object reordering, new paver tools, new irrigation tools, new fill symbol tools, improved font tools, and much, much more.

Version 19 offers new and enhanced tools for photo imaging, CAD, 3D rendering, and estimating. "The new Version 19 has something for everyone no matter what type of design they are doing," says Pete Lord, president of Drafix Software.

"New users will find that PRO Landscape contains everything they need to improve their design process, increase their professionalism, and most importantly, sell more jobs. Designers already using PRO Landscape will find that the new Version 19 includes valuable additions created to make their current software even better."
