FAIRFIELD, Ohio – FINN Corporation, a world leader in the manufacturing of environmental, erosion control and landscape equipment and materials, has hired Tim Boyle to the newly created position of director of aftermarket. Boyle will manage the FINN aftermarket activities for the parts, service and warranty departments. He begins his new duties immediately.

Boyle will focus on improving current processes, internal and external communication, customer satisfaction and developing new strategies to maximize aftermarket revenue. Improving customer and dealer satisfaction levels will be a key focus as he works cross functionally with production and engineering to simplify repair and maintenance solutions on FINN equipment.

Boyle comes to FINN with 16 years experience at Meritor, a leading global supplier of drivetrain, mobility, braking and aftermarket solutions for commercial vehicle and industrial markets and at Meritor WABCO, a joint venture between U.S.-based Meritor and German based WABCO manufacturing. Working his way up from remanufactured products project manager at Meritor to plant manager for Meritor WABCO, Boyle drove results in all operation areas including inventory optimization, improved customer fill rates, supplier consolidation, logistics cost savings, vendor cost reductions and distribution operation improvements.
