Here's a look at the new products that our advertisers will be showcasing at this year's GIE+EXPO.

Big Features in a Small Package

New Grasshopper model 226v offers commercial power, perfect cut and smooth handling in a MidMount mower with a 26 hp Professional Series V-Twin engine, commercial-grade pump and wheel motor drive system. Features include robotically-welded, fabricated 5.5-inch-deep cutting decks with optional mulch and PowerVac capability, and the Advanced Debris Management System.

Electric Spreading & Spraying

C&S Turf Care Equipment has introduced the Turf Tracker ARC, an all-electric, zero-turn, riding spreader/sprayer. The state-of-the-art, low-maintenance design allows operators to spread and spray an acre of turf in 10 minutes. The ARC lasts all day on a single charge, with no emissions or noise. It handles well on hilly, uneven terrain.

Versatile Applicator

Ecolawn's topdresser is a multipurpose, self-propelled, motorized applicator built for professionals working in turf care, topdressing and turf renovation. It is versatile and maneuverable, operating even on steep grades. It can spread a variety of materials, including compost, organic matter, fertilizer, lime, calcite clay, pelletized products, sand and salt.

Customizable Debris Loader

Billy Goat introduced the DL Series debris loaders, featuring CustomFit options for customizing the unit to your truck and trailer. It also has a dual shredding system with Piranha blade to maximize debris reduction and minimize dumping fees.

Another Option for Fuel Efficiency

Cub Cadet Commercial offers another option for fuel efficiency with the TANK S LP. Powered by either an 852 or 999cc Kawasaki engine, the mower offers reduced emissions and fuel costs while providing the same high performance of all TANK S units. The benefits of liquid propane also include longer engine life, longer run times and less engine maintenance. The TANK S LP meets all current EPA and CARB emissions standards.

Keep Cargo Safe and Secure

With the new AmeriDeck Contractor Service Cap attachment, operators can now keep items out of the weather while safely loading and unloading them at the job site. The body can securely hold up to 2,500 pounds of ladders, tools and materials.
