Horizon Distributors, Inc. announced it has become a distributor of Rain Bird turf irrigation products and Jacobsen turf maintenance equipment in both Florida and the Caribbean islands. Additionally, Horizon is now a distributor of Rain Bird Golf and Rain Bird International irrigation products throughout the Caribbean.

The Jacobsen and Rain Bird distributor partnerships are the result of Horizon's expansion into Florida and the Caribbean earlier this year, part of the company's continued growth plans.

Although the Horizon name may be new to many landscape professionals in the Southeast, the company is a well-established and respected industry supplier across America's greater Sun Belt, from the Pacific Northwest through California, Nevada and Arizona to Texas and now Florida and the Caribbean.

Now with over 60 locations in 10 states, Horizon has earned a reputation among its thousands of customers for quality materials and dependable service.
