Bobcat Company has expanded the flail mower attachment offering for compact excavators. The flail mower model is available for use with Bobcat E63, E80 and E85 excavators.

The flail mower attachment provides safety, performance and uptime protection in mowing and land-clearing applications. It also has multiple safety features such as a side safety chain within the housing unit to help deflect and contain debris that could be thrown during operation. A rotor brake stops the flail mower from full speed in seven seconds or less when the flail mower hydraulics are deactivated.

The compact deck allows the flail mower to manage varying ground contours and hard-to-reach places, maintaining surface contact for efficient cutting.

The direct-drive motor excels in aggressive cutting applications and the X-Change attachment mounting system makes it easy to connect the 40-inch FMR flail mower to the E63. A pin-on mounting system or optional pin-grabber quick coupler option are available for connecting the 40-inch FMR flail mower to the E80 and E85 excavators.
