

PRO Landscape Announces New Design App

Source: www.TurfMagazine.com

KANSAS CITY, Mo. – PRO Landscape has unveiled a landscape design and bidding app built specifically for landscape professionals.  The PRO Landscape Contractor app lets you create stunning visual designs and price quotes right on your iPad or Android tablet. Simply take a picture with your tablet, drag and drop plants, add in mulch, grass, hardscapes, statuary and much more. With PRO Landscape Contractor you can create designs on-site, even with the customer watching. Key features in the PRO Landscape Contractor app include: Create visual designs that sell-

- Create visual designs starting with a photo of your customer's house of building.
- Drag and drop plants, hardscapes and more to create visual designs customers will easily understand.
- Easily create custom shapes for areas such as grass, mulch and pavers.
- A cutout tool lets you cover up (clone) the existing landscaping on your renovation projects.
- Add the before picture to show a "before & after" design.

Large image library-

- Online access to the complete PRO Landscape Library of over 11,000 high-quality photos on our cloud-based server.
- Downloaded images can be saved to your local favorites.
- Set your climate zone to just show plants for your zone(s).
- Search the image library by common or botanical name.

Create price quotes for your projects-

- Create instant proposals right in the app using your own prices.
- Adjust prices, sizes and quantity to finalize the quote.
- Save prices for use in your next design.

Share your designs-

- Email your designs right to your customers, or post on your favorite social media site such as Facebook or Twitter.
- Print, save as PDF or email your designs and quotes to your customers.

PRO Landscape Contractor for iPad can be found in the [Apple App Store](#), and will be available this fall for Android. PRO Landscape Contractor is free to download and try.
