The [Scotts LawnService](#) continues to expand the Scotts LawnService brand in new territories through franchising. New locations will soon be opening in Casper, Wyo., College Station, Texas, and Keene, N.H.

Scotts LawnService serves the "do-it-for-me" consumer in the U.S. with on-site lawn, tree and shrub fertilization, insect control and other related services. They have the products, experience and expertise to help consumers avoid the guesswork and uncertainty that comes from treating their own lawn.

Scotts LawnService provides their franchises training, marketing, top industry software and on-going support.

Bruce Albright, owner of the new Scotts LawnService franchise in College Station, Texas, has seen first-hand the benefits of using Scotts products, "I have been using Scotts products for years to keep my property looking beautiful, and my wife and I are blessed to have been chosen to be part of the most recognized name in the green industry and provide world class lawn care to the College Station community."

Both Nick Gladke of Keene, N.H., and partners Terry Chase and Michael Cover of Casper, Wyo., have been in the green industry for years, but are pleased to join the Scotts LawnService Franchise system to bring the trusted Scotts brand to their respective communities. Gladke will be servicing both Southwestern New Hampshire and Southern Vermont. The partnership of Chase and Cover will be providing Scotts LawnService to a large territory in Wyoming.
