SiteOne® Landscape Supply has launched new, exclusive [LESCO](#) renovation products, including the Pro-Aer 30 and Pro-Aer 36 stand-on aerators, Pro-Aer 24 walk aerator and the Renovator 24 seeder. The new lineup helps landscapers enhance the look of lawns by adding oxygen to soil, filling in bare spots, improving density of turf, improving grass variety and color, and more.

“The addition of the new line of LESCO renovation products truly makes SiteOne a one-stop-shop for all turf maintenance and improvement needs,” said Nick Schomer, Senior Category Manager of Equipment at [SiteOne](#). “This exclusive new line of products, combined with excellent financing options through SiteOne, offer a unique opportunity for landscape professionals.”

The Pro-Aer 30 and Pro-Aer 36 models are highly productive commercial stand-on aerators, available both with or without a seed box, featuring a chain-free design to eliminate the cost and hassle of expensive breakdowns. Powered by a robust Vanguard V-twin engine, the LESCO renovation units are supported by a 3-year commercial limited warranty. The integrated seed box model eliminates the need for post-aeration seed application to complete projects in one easy pass, reducing the need to return and reapply seed.

Powered by a Honda 10.5 hp engine, the Pro-Aer 24 walk model features dual-hydros for easy operation and increased productivity. Robust design utilizes sealed chains, hard linkages and easy tine access.

The Renovator 24 seeder is a powerful and productive powerseeder, featuring a dual-hydro static drive and counter-rotating blades to cut through even the toughest of soil conditions.

“In addition to the new renovation products, SiteOne will also soon be launching a line of application equipment available in select regions in 2021 and nationwide in 2022,” said Schomer.

Visit the SiteOne outdoor booth during [GIE-EXPO](#) (Booth No. 7428D) – Oct. 20-22 in Louisville, KY to demo the new LESCO overseeder or aerator and receive 5% off any LESCO equipment purchase by November 30, 2021.
