

# Texas Propane Mower Center Adds Alt Fuel Conversions to Expertise

Source: [www.TurfMagazine.com](http://www.TurfMagazine.com)

McCoy's Lawn Equipment Center is the newest certified Alliance AutoGas conversion center, supporting fellow Alliance partner Pinnacle Propane to help Texas Hill Country fleets run on propane autogas. A longtime provider of propane-powered mowers and conversions, McCoy's now expands their expertise to alternative fuel vehicles.

McCoy's customers have enjoyed the performance and affordability of propane mowers so much, they want to transport their equipment with clean autogas trucks.

Autogas fleets currently save around \$1.50 per gallon on fuel compared to gasoline; and because autogas is a cleaner-burning fuel, fleets also report requiring less maintenance. Vehicle conversion financing through Alliance AutoGas enables fleets to see fuel-cost savings from day one.

For over 17 years, McCoy's Lawn Equipment Center has grown from a specialty shop to one of the largest multiline lawn and landscape equipment dealers in the Austin area. McCoy's began converting and selling commercial propane mowers in 2006, and now provides propane autogas vehicle conversions as part of the complete Alliance AutoGas program for fleets.
