

Toro Launches Mobile Website for Landscape Contractors

Source: www.TurfMagazine.com

Access information from anywhere with Toro's new mobile website, www.m.toro.com/LCE , specifically designed for professional landscape contractors to deliver optimum performance on smartphones. The site features a current, hourly and 10-day forecast, plus weather radar, parts and product information, dealer locator with maps and distances, Toro highlights and special offers, as well as operator training and safety tips.

The Toro mobile website is not an app, so there is no need to access the app store to download updates. As Toro continues to enhance the features of the website, those updates will be instantly available to the site's users. The easiest way to access the Toro mobile website is by bookmarking it on the home screen of a smartphone.
